General Description

The PRO-9716 chassis contains four PRO-9705 four port transmitters which can be used as individual cards or linked to make up 16 outputs. The unit is powered by a single desktop power supply, providing power to all four cards. From any one output, up to 10x PRO 9703 and 1x PRO 9701 can be connected to support up to 22 remote display screens.
